

# HARRIS COUNTY MUNICIPAL UTILITY DISTRICT NO. 500

## Lake G Dredging Update - 4/5/2019

The District's engineer has received and reviewed the survey data and concluded that the majority of the Lake 1G dredging project is complete. Accordingly, we have notified the Towne Lake Community Association that Lake 1G may be reopened. Based on the survey data, the District's engineer also determined that there are several areas in which additional work is needed, including in the main entry canal and in the boat slip area adjacent to two residences. The District has notified the two affected residents.

The District's engineer anticipates that the additional work will take approximately one week to complete. During this time, please be alert for workers in the area and exercise caution.

For questions about this project please contact Kara Morrison or J.T. Gaden, with EHRA Engineering, at 713-784-4500.
